VLF 950 / VLF 951 WIRE LOCATOR

Industry

FEATURES

- ✓ For finding and locating
- ✓ Active and inactive buried cables
- ✓ Metal pipes etc.
- ✓ Passive VLF principle
- ✓ Optional cable transmitter in preparation

APPLICATION

The VLF 950 handheld detector is a battery-powered aid to detecting and locating electric conductors, power cables and pipes that are hidden underground. The handheld detector is used in civil engineering, for geophysical drilling tasks and in soil clean-up operations. A detector with cable transmitter is in preparation.

DESIGN

the frequency of which rises as you approach the cable you are looking for. Headphones can be used in noisy environments.
