Blast-resistant hand-tools for humanitarian demining.

In line with IMAS 10.30 (and design rules arising from US funded research) Security Devices has been supplying blast-resistant tools for more than ten years. Be aware that some other tools offered as “blast-resistant” are poor copies. Others break the design rules by having many parts, being short, or by using very hard steels.

Blast resistance does not mean “blast-proof”. The tools are designed to distort in a blast event (which reduces the risk of breakage) and to remain in one piece, so reducing the risk of injury from parts of the tool. They are also designed to keep the user’s hand low to the ground and far enough from an anti-personnel mine blast to avoid severe hand injury.

Our blast-resistant tools are designed to be used when exposing a mine, and augment our other “demining tools” that are also designed for purpose but do not need to be blast-resistant.

The blast resistant tools shown here can be supplied in a tool-roll when purchased together.

NOTE: Our blast-resistant tools have been tested against AP blast mines and performed well, BUT each blast is

Order numbers

- A** – Demining brush (SKU3018)
- B** – Oval-profile prodder (SKU3010)
- C** – Demining trowel (SKU3012)
- D** – T profile pick-prod (SKU3011)
- E** – Tool-roll (SKU3013)

different, and we cannot guarantee that this will always be the case.

Non-Technical Survey Field Kits

Non-Technical Survey Field Kit

Due to the limited availability of certain equipment in a lot of countries, We have decided to compile a complete field kit for NTS teams. All together in one bag.

Non-Technical Survey Field Kit

Consists of :

Kit also includes:

Ruler
Caliper set
Mobile drawing board
A3/A4 Graphic paper
Clipboard
pens
Pencil
Eraser
Notebook
IVAC Kit
Canvas carry bag.

Exploders and Blast Cables

ITEM	STOCK CODE	Image	DESCRIPTION	QTY	Price
1	WI-001		The Wizard 50G3 mini blasting machine is a capacitor discharge machine, and very reliable. Longer battery life with a large CR123A 3-volt battery (in a separate compartment from the electronic components) One-year warranty		
2	WI-002		Wizard Demolition Safety Light is a safe electronic device specifically designed for checking the continuity of firing circuits or electrically initiated pyrotechnic devices. The "DSL" will ensure that your electrical wires have a complete circuit, so that your matches and squibs also have a complete circuit.		
	LV-001	 <p>SHOT EXPLODER (ELEX 7) Designed for EOD and IEDD use. Single channel pocket size initiator for detonators and fuses. Replaceable standard batteries. Robust, water resistant enclosure enables usage in harsh environment. Easy to operate with extensive safe features and interlocks. Integrated continuity tester. High energy Output : > 6 Joules, > 350 Volt Dimensions : 79X155X32mm 550gram Safety key optional.</p>	Shot Exploder (ELEX 7) Designed for EOD and IEDD use. Hook and line Kits

Product code: IA-030

Description:

PERSPEX EXTENSION COLLAR
HOOK LARGE SINGLE PLAIN
HOOK LARGE SINGLE BARBED
HOOK MEDIUM SINGLE PLAIN

Product code: LVP 007 / Basic Hook and Line Kit

DESCRIPTION

Basic Hook and Line Set. Manufactured Parts are all locally manufactured in South Africa. Specs can be adjusted and manufactured to Client's requirements and specifications.

Echo Hook and Line Kit

Product code: LVP-0029

	MED-002		OLAES Modular Bandage Elastic wrap with built in 'Control Strips' to prevent inadvertent unravelling. 3 meters of sterile 4 ply gauze Plastic occlusive sheet included in dressing pocket Transparent pressure cup that focuses pressure on the wound site and allows for visual	\$59.00
	MED-003		HyFin Vent Chest Seal Twin Pack Twin Pack from North American Rescue Providing two vented chest seals in one package for treatment of both entry/exit or multiple penetrating injuries to the chest. The 3-vent channels allow blood to escape and provide a fail-safe system, as even if two of the three channels become obstructed, the vent will remain operational. Easy-to-open foil pouch	\$25.00

<p>MED -004</p>		<p>Combat Application Tourniquet</p> <p>The patented C-A-T® is a true one-handed tourniquet proven to be 100% effective by the U.S. Army's Institute of Surgical Research. Tests proved that the CAT completely occluded blood flow of an extremity in the event of a traumatic wound with significant haemorrhage. The Gen 7 CAT utilizes a durable windlass system with a patented free-moving internal band providing true circumferential pressure to the extremity. Once adequately tightened, bleeding will cease, and the windlass is locked into place. A hook and loop windlass retention strap is then applied, securing the windlass to maintain pressure during casualty evacuation. The patented Combat Application Tourniquet® (C-A-T®) featuring the proprietary red tip design and the mechanical advantage of a band within a band has been the Official Tourniquet of the U.S. Army since 2005</p>	<p>\$56.00</p>
<p>MED -007</p>		<p>Disposable scalpels</p> <p>MS-IO</p>	<p>\$2.00</p>
<p>MED -011</p>		<p>Control Wrap – 4 Inch Bandage</p> <p>Just as in our OLAES® and BLAST® Bandages, we incorporate a series of brakes into each elastic bandage. These brakes prevent accidental un-rolling during application. The brakes also provide grip surfaces during the wrapping process and assist in maintaining the desired pressure and position of the bandage. This is extremely helpful when changing angles during the wrapping process or if bandaging awkward injuries.</p>	<p>\$3.75</p>
<p>MED -012</p>		<p>LUBRICATING GEL SACHETS – 2.7g</p> <p>2.7g sachets</p> <p>Water Soluble</p>	<p>\$0.25</p>
